Github: <https://github.com/dayo-code>

Experienced Laravel developer with 5 years of hands-on experience, skilled in building scalable APIs, optimizing performance, and managing databases. Proficient in PHP(Laravel) with a focus on delivering secure and efficient server-side solutions.

Skills

Backend: PHP, Laravel, CodeIgniter, MySQL, MongoDB, Redis, GraphQL, RESTful APIs.

Frontend: Blade, ReactJs, VueJs, NextJs, HTML, CSS, Tailwind CSS, Javascript, JQuery.

Tools & Technologies: n8n, Git, Vite, PHPUnit, PEST, GCP, Pinecone.

Others: Debugging skills, AI integration (OpenAI API), Payment gateways, Database design, Clean Architecture, SOLID principles OOP, Team work and Collaboration, Critical thinking.

Professional Experience

Financier24 (AI-Powered Car Leasing Assistant)

- Built and maintained the backend using Laravel, MySQL, and OpenAI integration.
- Developed multilingual AI assistant features supporting text and audio inputs.
- Implemented contextual memory and function-calling features for personalized user experiences.
- Integrated real-time quote request handling and car recommendation system using Pinecone and Laravel queues.
- Enabled users to chat with the AI directly via WhatsApp, integrated through n8n for seamless automation and workflow management.

Spotmate (Fitness & Social App)

- Led backend development in Laravel to build APIs consumed by a React Native mobile app and NextJs web app.
- Designed meal and workout planning modules, chat systems, and AI-assisted meal and workout recommendations.
- Managed user authentication(Google and Facebook login), achievements tracking, and database architecture.
- Collaborated closely with the frontend team to ensure smooth API integration.

Uniskills (AI-Powered Talent Matching Platform)

-
- Developed web application interfaces using Laravel Blade, Livewire, and Tailwind CSS.
 - Improved system performance by optimizing Laravel backend queries and asset loading.
 - Created reusable components and clean, maintainable Blade templates for a seamless user experience.
 - Collaborated with designers and product teams to enhance UI/UX consistency across modules.

Work History

2022-04 - Current

Full Stack Web Developer

Uniskills, Remote

- Increased website performance by optimizing front-end and back-end code for faster loading times.
- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.

2021-12 - 2022-04

Web Developer

Acomart Media Group LLC, South Africa

- Integrated third-party APIs from external applications into web platforms.
- Managed efficient SQL queries and data transport.
- Streamlined API integration for seamless communication between frontend and backend systems.

2021-06 - 2021-12

Full Stack Web Developer

9jabizz Resources Limited, Lagos, Nigeria

- Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.
- Migrated legacy systems to modern technologies, resulting in improved system stability and reduced maintenance costs.

Education

2019-11

Bachelor of Science: Computer Science

University of Ilorin - Nigeria

Certifications

2020-03

Software Development Diploma, Moat Academy
